

Special Services (SpS) Known Bugs List

Id	Name	Description	Related Cases	Found In	Status	Planned Release
2908	SpS - Security - Principals/Admins With Classes Cannot See All Building-Wide Students	<P>Users with building-wide access accounts (School Admin, Principal, Clerical, Guidance, etc) and classes assigned to their account can only see the classes and corresponding students in SpS. These users are unable to see the remainder of the students, who are not in their classes, in the buildings to which they have access. WORKAROUND: Users with such access can hide all classes in the Gradebook, then when accessing SpS the user will see all building(s) to which they are granted access. User can unhide the classes to return to class only view.</P>	TCCSA 62370	9.6.2	Reviewed Defect (PB/SpS)	
2976	SpS - Mac - Timeout Login page displays when Saving or Saving & Closing	<P>Mac/Safari users are seeing the Timeout Login page display when hitting Save Form or Save & Close buttons until the page refreshes to the saved page or Open Tasks screen, respectively. The users are not being forced to log in again, the page just displays on slower connects causing some confusion.</P>	SA	10.0.0	Reviewed Defect (PB/SpS)	
3015	SpS - D2D - Transfer Successful Message Displays When Beginning Next Transfer	When completing a D2D Transfer, then selecting a new student, the previous transfer message "Your Transfer Has Been Sent" still displays on the bottom of the screen. The original transfer does send successfully, but the message confuses users as they begin to transfer another student's forms. WORKAROUND: Select "Transfer Student" icon on left of screen prior to beginning next student transfer.	SWOCA 62660	10.0.0	Reviewed Defect (PB/SpS)	
2173	SpS - EMIS - Remove Data Associated with Removed Tests	The testing information (grade level, test type, testing accommodations, etc) tied to tests no longer applicable (4th Writing, 7th Writing, 5th Social Studies, and 8th Social Studies) still display on the EMIS DCF though the test itself does not. Users would like this information to no longer display to avoid confusion. WORKAROUND: Manually remove data values from the EMIS DCF and save changes to the page.	SA	9.2.3	Reviewed Defect (PB/SpS)	
2987	SpS - EMIS DCF - Date of Test List Needs Updated	Date of Test options for the 2011-2012 school year are not in the drop down list. So, when those dates are applicable for a student's test the code displays on the EMIS DCF (e.g. 201108) instead of the description (e.g. August 2011). This also causes the EMIS Extract to error stating that there is a missing/invalid Date of Test value and the testing date is blank on the extract.	internal, HCCA 62912	10.1.0	Reviewed Defect (PB/SpS)	
2938	SpS - EMIS Extract - GE Not Displaying IEP Test Type Value if Outcome ID Value is Missing	On the EMIS Extract GE Record, the IEP Test Type value is not populating on the record if the corresponding event's Outcome ID is left blank. Upon correcting the missing Outcome ID value, both the corrected Outcome ID and existing IEP Test Type values will populate on the Extract GE record for the event. The EMIS Extract Error messages does warn users of missing Outcome ID value to correct the problem and get the GE record to populate correctly. WORKAROUND: Enter correct Outcome ID value and GE record will create properly.	SA	10.0.0	Reviewed Defect (PB/SpS)	
2102	SpS - EMIS Report - Selection for Service Plan Effective Dates	<P>On the EMIS Report Selection Screen, the checkboxes for Service Plan Start and End dates are not included and therefore cannot be displayed on the EMIS Report.</P>	NEONET 60462	9.2.3	Reviewed Defect (PB/SpS)	
2975	SpS - EMIS Report - Unable to Sort by DOR or DOS	<P>When running the EMIS Review Report and sorting by District of Residence (DOR) or District of Service (DOS), the user will receive an error instead of the results of the report. WORKAROUND: Run the EMIS Review Report with the sort of any other field selected.</P>	SA	10.1.0	Reviewed Defect (PB/SpS)	
2959	SpS - Bank Import - Errors if Text Includes Symbols < or > That Run into a Word	On the Bank Import screen, users receive an error when attempting to navigate to another section if their current section text contains a less than or greater than symbol that runs into a word, for example, "<than" instead of "< than". WORKAROUND: Insert space between symbol and other text.	TCCSA 62753	10.0.0	Reviewed Defect (PB/SpS)	

Special Services (SpS) Known Bugs List

Id	Name	Description	Related Cases	Found In	Status	Planned Release
2973	SpS - ETR 4 - Disability Category List Not Active Until Student Properties is Saved	<P>The Disability Category drop down list on the ETR 4 Eligibility page does not allow the users to select a new value if the user has not saved the Student Properties; however, the drop down list should work regardless of saving Student Properties. WORKAROUND: Click Save button on Student Properties, then open ETR 4 Eligibility page to save disability category.</P>	SA	10.0.0	Reviewed Defect (PB/SpS)	
3016	SpS - PR03-01 - Misspelling of "Relevant" on Manifestation Determination Worksheet	The word "relevant" is misspelled in the Section III and Section V headers as "relavent".	SA	10.1.0	Reviewed Defect (PB/SpS)	
3018	SpS - SP 3 - Checkboxes Not Saving on SP 3 Testing Page	On the SP 3 Testing Page, the "Child is excused from the consequences of not passing the OGT in the following subjects" checkbox values are not displaying on the page when it is saved and reopened.	SA	10.1.0	Reviewed Defect (PB/SpS)	
2977	SpS - SPPR - Font Error on 8 Column Divided Comments (8GXD) Form	<P>The Service Plan Progress Report 8GXD (8 column, goals only, divided comments) "SP" page title displays improperly and generates error message if user does not have Felix Titling font installed on their computer. The page will also display improperly when printing for these users. Users with the font installed will experience no issues, however, the page should be displaying properly regardless of the fonts the user has installed.</P>	SA	10.0.0	Reviewed Defect (PB/SpS)	
3017	SpS - CFE - ETR 1 - Evaluation Methods Not Copying on Optional Pages	<P>When creating an ETR task using Create from Existing (CFE), the "Evaluation Methods and Strategies" check boxes do not copy over on the optional ETR forms: ETR Communication Skills, ETR Fine Motor Skills, ETR Gross Motor Skills, ETR Hearing, ETR Social Emotional Status, and ETR Vision.</P>	SA	10.1.0	Reviewed Defect (PB/SpS)	
3021	SpS - CFE - IEP - Missing Date of Test Values for EMIS Without Save	On IEP tasks created using Create from Existing, the date of test values are not automatically populating for EMIS unless the IEP 12 Testing page was saved prior to task completion. WORKAROUND: Open and save the IEP 12 Testing page prior to completing task.	HCCA - 62860	10.0.0	Reviewed Defect (PB/SpS)	
2847	SpS - CFE - IEP - Original and New Services Both Display on EMIS DCF	<P>When a IEP is created using Create from Existing (CFE) and the services are modified on the IEP 7 Services page, the EMIS DCF displays both the new and the original services information in the Related Services section. It should only be displaying the information on the current open IEP task.</P>	Omeresa - 62066, HCCA - 62244, SWOCA - Internal, LNOCA 62544/62493	9.6.0	Reviewed Defect (PB/SpS)	
3009	SpS - CFE - WEP - Displaying Different Dates	When a WEP is created using Create from Existing (CFE) and the dates are changed, users are seeing the old dates display on Print View, though new dates are displaying on Page Edit.	SWOCA 62484	10.0.0	Reviewed Defect (PB/SpS)	
2148	SpS - Open Tasks - Cannot Create from Existing on a set finalized in Classic View	Users are not able to create new tasks using Create from Existing to pull information from finalized Classic View sets. The Create From Existing list only displays completed tasks, not these finalized sets.	SWOCA 60505	9.2.4	Reviewed Defect (PB/SpS)	
2907	SpS - Open Tasks - Grade Levels Not Updating When Using CFE	When creating a new task, using Create from Existing (CFE), the grade levels from the original task are displaying on the new task instead of the grade level selected on the Start a Task screen. WORKAROUND: Select desired grade levels on task cover page and save page.	SWOCA - 62286; Harris - 62786	9.6.2	Reviewed Defect (PB/SpS)	
1868	SpS - Open Tasks - Student Properties Link Disappears	On accessing Open Tasks screen when default class has no students assigned, Student Properties link does not display. Link does not reappear even after new class and student are selected.	NCOCC 58751	9.1.4	Reviewed Defect (PB/SpS)	

Special Services (SpS) Known Bugs List

Id	Name	Description	Related Cases	Found In	Status	Planned Release
2939	SpS - Verify EMIS DCF - Events Data Pulling from Multiple Tasks	On Verify EMIS DCF, when more than one task contains event data for the same event, the date field will pull from that Special Ed Events page on the last task it was added to while the Outcome ID, Non-Compliance ID, etc values will pull from the first task it was added to. For example, if an RIEP task has a Special Ed Events page with RETR and RIEP data entered, then an RETR task was created with a Special Ed Events page with RETR data entered, the RETR date will pull from RETR task, but the RETR Outcome ID and RETR Non-Compliance ID will pull from RIEP task. When the information matches and the user does not need to make corrects, they will not experience any issues. However, when modifications need made, the user must make them in both places for the Verify EMIS DCF to be correct. All information should pull in the same order, first from the primary task, RETR task for RETR data, then from the secondary task if the primary is blank, RIEP task for RETR data if RETR is blank. WORKAROUND: Only enter Special Ed Events data on the primary task for that event, or if already entered in multiple tasks, correct any data errors in both locations.	HCCA - 62541	9.6.2	Reviewed Defect (PB/SpS)	
2972	SpS - Student Properties - Disability Category Not Updating with SIS Refresh	<P>The student's disability category value is not updating on the Student Properties page after clicking the Refresh button when the message "This student's demographic information does not match the correct data in the Student Information system. Click refresh to reload data from SIS." appears. Other fields are updating properly. WORKAROUND: Manually select the new disability condition value on the Student Properties screen or the ETR 4 Eligibility page.</P>	NCOCC 62620	10.0.0	Reviewed Defect (PB/SpS)	
1987	SpS - Print Blank Forms - Add PR-05 Parent Consent	<P>The PR-05 Parent Consent form is missing from the form groups on the Reports-Print Blanks Forms page. Users are currently unable to print blank copies of this form.</P>	HCCA 59743	9.1.8	Reviewed Defect (PB/SpS)	
2881	SpS - Reports - Dates on Reports Sort as Numerical Text, Not Dates	The dates on reports sort as numerical text instead of dates. For example, the IEP Due Date Report, when sorted by the IEP Due Date column will display dates in the following order instead of chronologically: 1/24/2011, 1/31/2011, 11/1/2010, 12/8/2010, 4/22/2011, 9/22/2010.	LACA - 62198	9.6.2	Reviewed Defect (PB/SpS)	
3031	SpS - Task Queue - Priority Tasks Grouping Showing Previously Enrolled Students	Users with Teacher access are seeing students no longer enrolled in user's current classes display in the Priority Tasks section of the Task Queue page if the user marked the student's task as a Priority when the student was enrolled in one of the user's classes. Clicking on the task results in an error as user no longer has access to the student.	MEC - 63005 Harris - 63046	10.0.0	Reviewed Defect (PB/SpS)	
3002	SpS - Task Queue - Users with Multiple Staff Records Not Displaying All Student's Open Tasks	<P>Users with multiple staff records tied to one login name are seeing their Task Queue screen display only open tasks for students tied to one staff record, not all staff records even though drop down lists on the Task Queue screen display all classes/buildings properly. Users are able to see all classes and students on other screens in Special Services.</P>	62643 MEC, 62055 NOECA	10.0.0	Reviewed Defect (PB/SpS)
