

## **EMIS\_R Newsflash – November 13, 2009**

### **Contents:**

- EMIS Redesign – Performance Period Update

### **EMIS Redesign – Performance Period Update**

Although much progress has been made at the ITC level where the Data Collector, validation data, and the collection requests are now available and ready to use, ODE is still not at a level where data can be submitted via the Data Collector. This unfortunately means that the Performance Period cannot begin on November 16, 2009. At this time no date has been established for the next attempt to begin the Performance Period. Until a new date can be established the system can be used to train or practice, but until ODE is in a better position to accept data in a production environment, we ask that data not be submitted to ODE via the Data Collector. ODE will communicate when it is possible to submit data.

The Performance Period Plan posted on the EMIS\_R webpage will again be updated once new dates have been established.

Once again ODE appreciates your understanding and continued support of this project.
